

How to Run the Data Processing Pipeline

How to Run the Data Processing Pipeline

Generate your daily agent performance report - no coding required!

Step 1: Get Your Data Ready

Make sure you have these three files saved in one folder:

- agent_roster.csv
- call_logs.csv
- disposition_summary.csv

Example folder location:

D:/my_data/input

or

C:/Users/YourName/Documents/input_data

Step 2: Open the Command Prompt

1. Press Win + R on your keyboard
2. Type cmd, then press Enter

Step 3: Navigate to the Project Folder

Type this command to go to the folder where the pipeline is located:

```
cd C:\Users\Aditya\Desktop\dpdzero
```

(Replace with your actual project folder path)

Step 4: Run the Pipeline

Type this command to start processing your data:

```
python run_pipeline.py --input_folder "D:/my_data/input"
```

(Replace with your actual data folder path)

Step 5: Enter the Date for the Report

When prompted, type the date in this format:

YYYY-MM-DD

Example:

2025-04-28

Step 6: View Your Report

After processing, your report will be saved in the 'report' folder.

File name format:

report/YYYY-MM-DD.txt

Example:

report/2025-04-28.txt

All Done!

That's it - one simple command for your daily call center summary.
